### **Abnormal Newborn Screening Tests to be Read on Saturdays and Holidays**

#### **Summary**

Effective Saturday, March 1, 2014, the S.C. Department of Health and Environmental Control (DHEC) lab will be open on Saturdays and holidays to read newborn screening test results. DHEC staff will call, email and fax the physicians of record (or their on-call physician) to alert them to abnormal test results for conditions with a high risk of mortality or imminent morbidity. If the specimen collection form does not list a physician of record, then DHEC and hospital staff will work together to directly contact the family.

Saturday and holiday notifications will be limited to the following rare, life-threatening diagnoses:

#### Amino Acid Disorders

Maple Syrup Urine Disease (MSUD)  
Citrullinemia  
Argininosuccinic Aciduria  
Tyrosinemia I

#### Organic Acid Disorders

Propionic Acidemia  
Methylmalonic Acidemia  
Isovaleric Acidemia  
2-methylbutyryl coA Dehydrogenase Deficiency (2-MBCD)  
3-methylcrotonyl coA Carboxylase Deficiency (3-MCC)  
Beta Ketothiolase Deficiency (SKAT)  
Glutaric Aciduria I

#### Fatty Acid Disorders

Glutaric Aciduria II  
Medium Chain Acyl coA Dehydrogenase Deficiency (MCAD)  
Long Chain 3-OH Acyl coA Dehydrogenase Deficiency (LCHAD)  
Very Long Chain Acyl coA Dehydrogenase Deficiency (VLCAD)  
Carnitine Uptake/Transport Defect (CUD)  
Carnitine Palmitoyltransferase I Deficiency (CPT I)  
Carnitine Palmitoyltransferase II Deficiency (CPT II)

### Others

Galactosemia

Biotinidase deficiency

Congenital Hypothyroidism

Congenital Adrenal Hyperplasia
